Trails Update for Tijuana River Valley Regional Park

San Diego, Calif. – Oct. 29, 2015: Updating the trail system at Tijuana River Valley Regional Park is a priority for the County of San Diego Department of Parks and Recreation (DPR). Efforts to preserve local habitats are being balanced by efforts to improve and expand trail access. Work is underway to complete a 22.5-mile non-motorized trail system.

Over the years, a number of unauthorized trails have appeared in the park. These trails are harmful to the natural environment, negatively impacting species population and the growth of native vegetation. DPR has launched a series of restoration projects in these areas.

If you stumble across a “habitat enhancement area” sign on your trek through the valley, please refrain from entering the area and stay on the designated path. Thank you for your continued use, and support, of the Tijuana River Valley.
